

Under the Weather?

Every flight, whether it is VFR or IFR, actual or forecast, requires an accurate knowledge of available resources. Modern trends in technology have provided new tools such as the ADDS Flight Path Tool, ADS-B FIS, Foreflight applications, AWOS/ASOS. This is an important seminar for pilots who want to add to their knowledge base and learn how to use these new weather sources, helping them make safer weather decisions. Please click on the link below to see more details and to register for this event on-line!

Directions: Please see map link for directions, seminar will be held in the Technology Building (has Observatory Dome).

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
